

June 11, 1957

George: ✓

In my letter of May 28, 1957 to you I mentioned that we were making optical wedges for use in establishing the altitude focus of the "C" Configuration. I would like to request an amendment to contract SC 21-54 to include this item as follows:

QTY.		UNIT PRICE	TOTAL PRICE
1	Set optical wedges, one step wedge and one plane wedge for setting focus of "C" Configuration and wedge mount.	\$3150.00	\$3150.00

These prices are F.O.B. Los Angeles, California.
Delivery is June 24, 1957.

Our price is based upon the following costs:

Model Shop (optical and mechanical) plus O. H.	\$1900.00
Engineering plus O. H.	\$600.00
Subtotal	\$2500.00
G & A @ 13%	\$320.00
	\$2820.00
Profit @ 12%	\$330.00
	\$3150.00

The use of a 13% G & A figure is solely because our contract target prices in the past have been based upon this figure. Its use here does not establish it as our actual rate this year.

For your information I discussed the use and principle of these wedges with Lou K. in my visit to your office of May 28, 1957.
